

# Optimize Your SYSPRO Experience with the **SYSPRO LEARNING CHANNEL**

## Overview

Whether you are new to SYSPRO or have been part of the SYSPRO community for years, education plays a vital role in optimizing your SYSPRO experience and usage. We understand that people learn differently, so the SYSPRO Learning Channel (SLC) provides a range of different educational material formats to suit your learning style and preference.

You can also use it to register for instructor-led training sessions, whether they take place in a physical or virtual classroom.

## Benefits

|  <b>For Learners</b>                                    |  <b>For Managers and Organizations</b>                        |
|--|--|
| Learn about new features and functions to keep you on top of your role   | The SLC functions as a Learning Management System which enables companies to measure and monitor the educational progress of each SYSPRO user    |
| Learn how to use SYSPRO to perform your day-to-day activities and be in the best position to prevent errors as well as application erosion | Tracking and reporting provides management with valuable insight into how well educational and organizational objectives are being met           |
| Stay up-to-date with ever-changing technological advances  | An organizational leaderboard allows for competitive learning and can encourage rewards and recognition programs for staff to empower themselves |
| Monitor your own progress and work at your own pace  |  |

# Features of SLC

## Open Learning

Provides a personalized experience, housing a vast collection of educational content, free to anyone registered on the InfoZone, including:

- Training guides covering SYSPRO modules, features, roles, processes, enhancements and solutions.
- Step-by-step 'how to' tutorials
- Feature demo videos
- Conceptual videos
- Recorded webinars
- Create your own content playlists and download files

| Tutorials         |
| Videos            |
| Recorded Webinars |
| <b>FREE</b>       |

## SLC Plus

In addition to the Open Learning content which is available to all members, the SLC Plus provides access to a huge collection of programs and courses, as well as SYSPRO Certifications.

- Follow structured programs or brush up on specific topics. Our programs and courses are available 24/7 to suit your need
- Work towards obtaining credits, badges and view your progress on the leaderboard
- Test your knowledge and prepare for exams
- Stay up-to-date and informed on the latest SYSPRO features and functions
- Monitor your own progress and compare your progress with others in your group on the leaderboard
- Become part of a community where you can learn, share and obtain a globally recognized certification
- End User Certifications: Write certification exams to obtain one or more SYSPRO End User Certifications. These each focus on an aspect of business which relates to specific roles. Hone in and perfect those skills which are relevant to you
- A Learning Path groups the certifications together and provides structure and guidance on what needs to be completed in order to become certified

## SYSPRO Product Programs and Courses

- The SYSPRO Learning Channel has over 80 programs covering subjects within Manufacturing, Distribution, Financial, Innovation, Administration and Technical areas.
- Programs provide a structured view of multiple e-learning courses covering a subject.
- Each course covers a topic and consists of a knowledge check to assess your understanding of the content. These courses also help to prepare you for exams, if you are working towards obtaining your certification. Learners can work through and complete courses anytime, anywhere.
- Programs and courses are tracked and users can return to the place within a course from where they left off.
- Completing courses awards you with credits, and once you have completed a program, you are awarded a badge.

## Did You Know?

Out of **359** Training Guides, the most viewed content is the Inventory Training Guide, followed by the 'How to use Business Insights' Tutorial

### Learning Paths and Certifications

- The role-based learning paths provide a structured view of certifications. Each learning path consists of multiple certifications, typically Level 1, Level 2 and Level 3 certifications. Certifications consist of one or more exams. Each exam provides you with links to the content you can use to prepare for the exam. Learners must pass all exams within a certification to become certified.

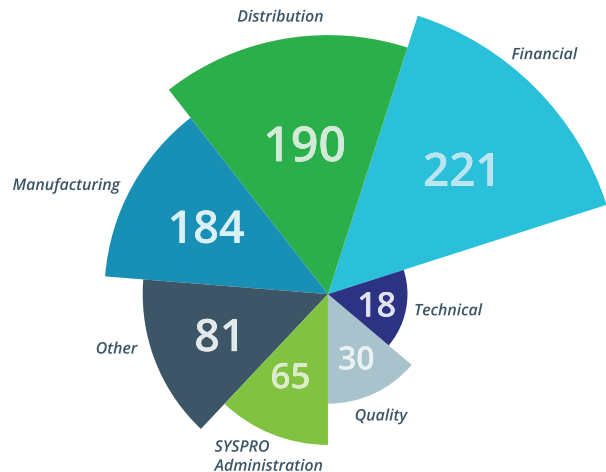

### Learner Management System Capabilities

- Programs, courses, certifications and exam progress and results are tracked and reported on.
- The SYSPRO Learning Channel provides transcripts for learners which record all their learning and achievements.

### Company Administrator Seat

- SYSPRO assigns a specific administration account to companies, enabling them to perform SLC administrative tasks. Company Administrators manage users' access to content as well as enrol users in the programs and courses.

### The Number of Courses are 789
