

# SYSPRO TRACEABILITY FOR AUTOMOTIVE PARTS AND ACCESSORIES

**More than Traceable.  
Actionable.**

Facing a recall?  
Trace. Isolate.  
Eliminate. Mitigate.

**1**

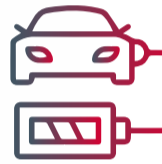

Product recalls are on the rise year on year due to:

Common Parts and Suppliers Across Multiple Model Lines

Cars are Lasting Longer

New Technologies

**2**

Navigating the complexity of a recall becomes simple when you're able to act quickly.

**3**

SYSPRO ERP goes beyond just providing data - it enables you to take actionable steps to mitigate risk before and during a recall.

**4**

SYSPRO ERP offers a fully integrated traceability system which enables manufacturers to...

**Trace. Isolate. Eliminate. Mitigate.**

- Track components, parts and products from receipt, through to build and delivery.
- Rapidly identify, quarantine and retrieve potentially defective goods.
- Accelerate the time to completion of your product recalls.

- Improve governance and drive compliance.
- Test and improve your traceability system.
- Remain compliant and meet regulatory requirements.
- Mitigate the risks associated with recall.

**5**

Consider the cost of not having an effective traceability system:

3.7M Vehicles Recalled  
Defective Seat Belt Buckle  
**Honda**

5.8M Vehicles Recalled  
for Fractured Bolts  
**General Motors**

5.7M Cars Recalled for  
Mats obstructing the  
Accelerator Pedal  
**BMW**

8.5M Vehicles False  
Results on Emissions  
**Volkswagen**

**6**
